The purpose of this short course is to provide poultry professionals with an intensive educational experience containing relevant, up to date information critical to efficient modern broiler production. Topics in the 2016 course will focus on the nutrition and health management of the modern broiler. The University of Georgia Poultry Science faculty are internationally recognized, have decades of "real world" experience and are considered to be among the best in the world in their respective areas of expertise. The UGA International Poultry Short Course is designed to be interactive and hands-on. The 3 ½ -day training is loaded with practical information meant to be directly applied to making a difference to the bottom line of your poultry business.
